

WIKICAREER

Backend Developer

Job Highlights:

- Be on the forefront of e-commerce innovation and technology
- Outstanding career growth and development opportunities

The Role:

You will apply your software development expertise and experience, to work on a number of foundational digital initiatives, across app, web and back end e-commerce, inventory, delivery and/or fulfillment systems.

You will utilise agile practices and develop software that services key business outcomes, whilst also protecting the quality of work at all stages of delivery.

Software development of various applications for key retail marketplace, delivery and e-commerce systems, incorporating front end and back end development activities

- Software development activities associated with the delivery of assigned stories and tasks
- Work in collaboration with team members following agile practices
- Protecting quality of work at all stages of delivery
- Managing IT related projects from planning and developing of web systems

Who are we looking for:

- Enthusiastic and positive team member with a self-directed and self-motivated attitude
- Excellent collaboration skills
- Strong problem-solving skills
- Ability to work collaboratively with stakeholders, business analysts, other developers and testers end to end
- Maintain up to date knowledge of contemporary approaches, techniques and technologies
- Able to work autonomously
- Comfortable working in a fast-paced environment
- Fluent in English (written and spoken)
- Position available for Malaysian citizens only

Role requires strong competency in these areas:

- Bachelor's degree in computer programming, computer science, or a related field. Fresh graduates are encouraged to apply
- More education or experience may be required.
- Fluency or understanding of specific languages, such as Java, PHP, or Python, and operating systems may be required.
- Strong understanding of the web development cycle and programming techniques and tools.
- Focus on efficiency, user experience, and process improvement.
- Excellent project and time management skills.
- Strong problem solving and verbal and written communication skills.
- Ability to work independently or with a group.

WIKICAREER

Company Profile

Inspired by Wikipedia's role as the largest and most popular online encyclopedia for just about any information, WikiCareer strives to be the next 'encyclopedia reference' for recruitment services! We are an up-and-coming nationwide staffing and recruitment company, offering a wide range of solutions in the HR services space for just about every industry.

Established in 2014, WikiCareer started out as an agency focused in providing consultancy and recruitment services for managerial or administration positions. Since then, we are proud to announce that we have been approved by Jabatan Tenaga Kerja (JTK) and Kementerian Dalam Negeri (KDN) to further expand our services to include both local and foreign workers of all levels.

WikiCareer has forged partnerships with several local vocational colleges and technical institutes to furnish excellent talents with relevant skills to boost their career opportunities. We take the lead in shaping the employment world by matching the right people with the right job that brings out our candidate's true potential.
