

Technical Specialist

ATG Nexus Sdn. Bhd., a proud subsidiary of **Ancom Nylex Berhad** is looking for a motivated **Technical Specialist** to support data analysis, reporting, and system-related tasks across the organization.

This role is suitable for individuals who are eager to learn, technically curious, and interested in working with data, dashboards, and business systems.

At ATG Nexus, we combine a warm, inclusive culture with a drive for excellence. You'll work alongside a high-performing team that supports one another, challenges ideas, and grows together.

What You Will Be Doing:

- **Develop & Enhance Reporting Solutions:** Assist in the development, maintenance, and enhancement of reports and dashboards to support business decision-making.
- **Data Support & Analysis:** Support data extraction, validation, and basic transformation to ensure accurate and reliable reporting outputs.
- **Business Collaboration:** Work closely with business users to understand reporting needs, functional requirements, and technical specifications.
- **BI Dashboard Support:** Support Power BI and/or Qlik Sense dashboards, including development, testing, troubleshooting, and performance optimization.
- **Technical Documentation:** Perform basic technical analysis and prepare clear documentation for reports, dashboards, and data processes.
- **System Support & Issue Resolution:** Assist in system support activities, including issue investigation, root cause analysis, and resolution.
- **Data Quality & Timeliness:** Ensure data accuracy, consistency, and timely delivery of reports in accordance with agreed service levels.
- **Continuous Improvement:** Participate in the continuous improvement of reporting standards, technical processes, and operational efficiency.

What We're Looking For:

- **Educational Background:** Bachelor's degree in Computer Science, Information Systems, or a related field.
- **Experience Level:** Open to fresh graduates and early-career professionals with a strong interest in data, reporting, and technical systems.

- **Data Fundamentals:** Basic understanding of data concepts, including tables, fields, measures, KPIs, and data relationships.
- **BI Tool Exposure:** Familiarity with **Power BI and/or Qlik Sense**, with hands-on exposure considered an advantage.
- **Technical Foundations:** Basic knowledge of SQL, Excel, or other data-related tools, with the ability to learn and apply them effectively.
- **Analytical Skills:** Strong analytical, problem-solving, and logical thinking skills to support reporting and technical analysis tasks.
- **Learning Mindset:** Demonstrated willingness to learn new tools, technologies, and industry best practices.
- **Communication & Teamwork:** Good communication skills with the ability to collaborate effectively within cross-functional teams.

Your Impact and Rewards (Focusing on Work-Life Integration)

- **Dedicated Core Hours & Flexible Integration:** We champion on work-life balance, prioritizing efficiency to ensure tasks are largely completed on time. While we value the flexibility to meet critical deadlines when needed, we actively support your time management to ensure quality personal time outside of work.
- **Competitive & Incentive-Driven Compensation:** Receive a competitive base salary, supplemented by Performance Incentive Program tied directly to the successful delivery and performance of projects.
- **Comprehensive Benefits & Accessibility:** Benefit from health insurance, promotion opportunities, and a convenient office location easily accessed via MRT (Phileo Damansara). As a subsidiary of Ancom Nylex Berhad, staff often enjoy exclusive access to group purchase programs, offering significant discounts.
