

WISE AI - AI Engineering Intern

About WISE AI

WISE AI is an award-winning Artificial Intelligence (AI) company specialising in digital identity technologies. We develop world-class emerging deep tech that is adopted by the government and multiple industries. Our AI-powered solutions include electronic Know Your Customer (e-KYC), digital Identity Document (ID) and digital signature. Our technology is optimized for the recognition of ASEAN faces.

Job description

We are looking for an Android App Developer Intern who possesses a passion for pushing mobile technologies to the limits. This developer will work with our AI Team to design and build the next generation of our current mobile application. Which includes but not limited to ideating, designing and implementing the app architecture and features.

Responsibilities

- Involve in Android application development using Java/Kotlin
- Build graphical user interface with reference to the spec and design provided by the AI Team
- Integration of REST API into the mobile app
- Collaborate with cross-functional teams to design and develop mobile application
- Debugging and testing code to make sure platform runs with minimum bugs
- Working in an agile development environment with limited supervision and guidance

Requirements

- Candidate shall be pursuing a Bachelor's Degree in Engineering (Computer Science/Information Technology or equivalent)
- Understanding of Java for Android app development.
- Comfortable knowledge of mobile app testing (different OS, manufacturer, screen size, common bug scenario)
- Knowledge in source code repository and branching models in Git and usage of tools such as GitHub or BitBucket

Bonus Points

- Familiarity with Flutter
- Understanding of deploying AI Models on the mobile app

Interested candidates please send in your CV to jane@wiseai.tech and specify you are applying for Mobile Developer Intern position
