Who We Are?

Core Consulting is an established IT consulting firm that helps major organisations in ASEAN from various industries including banking, insurance, government agencies, telcos, education and corporates to improve their end user experience and overall application performance. Through proven DevOps practices coupled with strategic monitoring deployment and software quality management, we help organisations to launch their core systems, software and critical applications successfully without any major performance incident when system goes live.

In Core Consulting, we continuously develop and invest in our people to build a great firm where everyone can make an impact, and enabling them to achieve their personal and professional goals.
