

## Join – Help Shape the Future of Financial Technology

*At FiNext, we build innovative solutions that help financial institutions streamline operations, boost efficiency, and deliver exceptional services. Our mission is to empower the financial sector through technology—not replace it—by creating tools that enhance expertise, decision-making, and business growth.*

*We're looking for passionate **Mobile Developer** to join our growing team. You'll be working alongside industry experts with deep experience in finance and technology, building products that make a real impact in today's fast-paced financial market.*

### What You'll Be Doing

- **Develop Robust Native Mobile Apps:** Design, build, and maintain high-performance mobile applications using Kotlin (Android) and/or Swift (iOS), with a strong emphasis on code quality, scalability, and maintainability.
- **Craft Great User Experiences:** Collaborate with designers and product managers to build intuitive, user-friendly interfaces, following platform-specific UI/UX best practices.
- **Champion Code Quality:** Write clean, well-documented, and testable code. Enforce coding standards, participate in code reviews, and contribute to best practices that maintain a healthy codebase.
- **Implement and Maintain App Architecture:** Use architectural patterns like MVVM, MVP, or MVC to ensure the code remains modular and scalable.
- **Debug and Optimize :** Diagnose and resolve complex issues using tools like Android Studio Debugger, Logcat, Xcode Instruments, Crashlytics, and performance profilers.
- **Ensure Security and Stability:** Implement security measures such as encrypted storage, secure communication protocols, and safe data handling practices.
- **Mentor and Support the Team:** Help grow the team's technical capabilities through mentorship, technical guidance, and constructive feedback.
- **Collaborate in Agile Teams:** Actively participate in sprint planning, backlog grooming, and cross-functional discussions to deliver value consistently and effectively.

### Who We're Looking For

- Solid experience in native Android or iOS development, with production apps built using Kotlin and/or Swift.
- Proficient in TCP socket communication and handling real-time data.
- Strong understanding of mobile architecture, component separation, and clean code principles.
- Experience designing and implementing user-focused UI/UX, aligned with Android and iOS platform standards.
- Proficient in platform-specific tools and environments such as Gradle (Android) and Cocoa (iOS).
- Skilled in integrating and debugging RESTful APIs, background services, and local data storage.
- Good understanding of secure app development practices.
- Proficient with version control systems (e.g., Git) and familiar with CI/CD pipelines — experience in writing automated unit, UI, and integration tests is a plus.
- Familiarity with Java (Android) and/or Objective-C (iOS) is an advantage.

### Nice to Have

- Experience with Flutter, React Native, or other cross-platform development tools.
- Familiarity with Fastlane, Firebase App Distribution, TestFlight, or OTA deployment pipelines.
- Published apps on the Google Play Store or Apple App Store.
- Performance optimization experience, including memory usage, startup time, and battery efficiency.

### Why Join FiNext

- Work on impactful projects with a dynamic and talented team.
- Gain exposure to cutting-edge backend technologies and scalable systems.
- Enjoy competitive compensation including contractual bonus and career growth opportunities.
