AEVUM DIGITAL SOLUTIONS

Location

Ipoh, Perak (Hybrid / Remote-First)

Duration

3 – 6 Months, **Target Start Date:** May 2026 (Negotiable)

Allowance

RM 700 + Performance Milestone Bonuses

About Aevum Digital

Aevum Digital Solutions provides technology solutions rooted in culture. We build the digital bridge between a city's heritage and future technology.

As an emerging Social Enterprise, our mission is to empower local micro-merchants and preserve the cultural heartbeat of our cities through high-end digital infrastructure. Our upcoming flagship project involves developing a Smart-City Ecosystem and Digital Tourism Pass designed to digitize cultural experiences and support local economies in Perak's historic capital.

The Mentorship: Learn from a Tech Veteran

You will be mentored directly by our CTO, a senior Data Architect & Backend Engineer with expertise in:

Big Data Engineering

High-performance data pipelines

Scalable Backend Systems

Architecture for thousands of users

Blockchain Infrastructure

Future-proofing cultural assets

This is a rare opportunity to have your code reviewed by an industry veteran who builds deep-tech systems.

The Environment: Startup Culture

Remote-First Coding

Work flexibly while collaborating via professional dev tools (GitHub/Slack) with our CTO.

Weekly Ipoh Sync

Meet in-person with the Project Lead (Founder) every week in Ipoh for strategy, "Ground-Truth" field testing at heritage sites, and rapid prototyping.

Pioneer Status

As a founding-team intern, you aren't just a coder; you are helping build the technical foundation of Aevum Digital from the ground up.

Ideal for Final Year Project (FYP)

This project offers a high-level technical scope (Fintech, QR Integration, Geolocation, and Big Data) that is perfect for a standout Final Year Project. We are happy to support and supervise your technical documentation.

Key Responsibilities

→ Develop and iterate mobile features using **Flutter & Dart**.

→ Integrate frontend screens with complex backend APIs designed by our CTO.

→ Participate in weekly **"Sprint Syncs"** in Ipoh to test app features (GPS/QR) at local merchant locations.

→ Contribute to the roadmap of a Social Enterprise aimed at cultural preservation.

Requirements

→ Currently pursuing a Degree/Diploma in Computer Science, Software Engineering, or IT.

→ Foundational knowledge of Flutter or strong logic in Object-Oriented Programming.

→ A passion for **Social Impact**—using tech to help people and preserve culture.

→ Highly disciplined for remote work and eager to learn from high-level technical mentors.

How to Apply

Email your CV/Resume and a short intro on why you love **"Tech + Culture"** to: **yuantengchoke@pm.me**
